

Southampton Safeguarding Children's Partnership

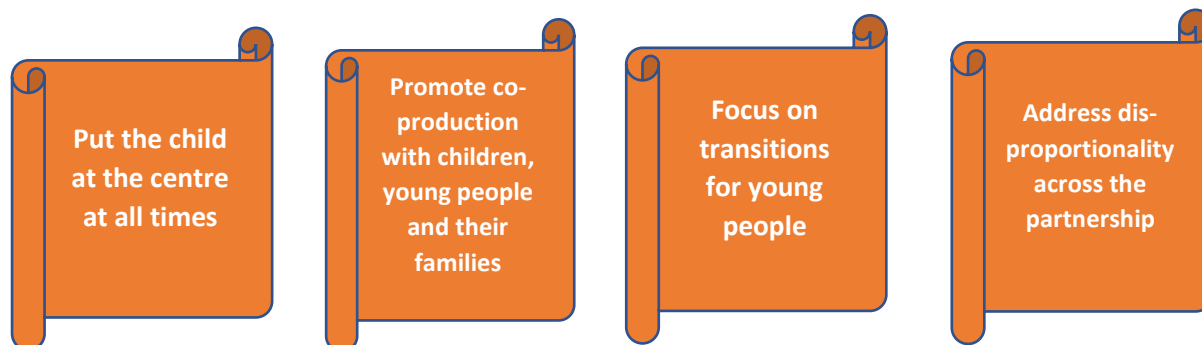

Strategic Plan 2023 - 2026

Our Principles

These are the principles that are integral to our work and which guide our approach to working with children, young people and their families

We will:

Our Strategic Priorities 2023 - 2026

Outcome 1: We will address the impact of neglect and gain assurance around the embedding of the neglect strategy for all practitioners working with children and their families

Across the next three years, this means:

- Identify the right levels of support and intervention for children and their families who are experiencing neglect
- Gain feedback from those with lived experience to continually improve practice

Our Strategic Priorities 2023 - 2026

Outcome 2: We will work as a partnership to support the reduction of serious youth violence and child exploitation

Across the next three years, this means:

- Work as a Partnership to understand how best to reduce the frequency of serious violent incidents involving our young people
- Work closely with young people to understand the risks of exploitation both within and outside the city

Our Strategic Priorities 2023 - 2026

Outcome 3: We will promote the Child Sexual Abuse Strategy and the roll out of the CSA toolkit so that children who experience child sexual abuse will receive more effective services

Across the next three years, this means:

- The Partnership will identify and respond effectively to concerns of child sexual abuse
- The CSA strategy and toolkit will be effectively used to inform interventions with children, young people and their families

Our Strategic Priorities 2023 - 2026

Outcome 4: We will focus on Children's Participation in Education across the Partnership to promote children's educational progress, for their wellbeing and for their wider development

Across the next three years, this means:

- The Partnership will work together to improve the participation of children and young people in education, employment and training
- The impact on children and young people's current lived experiences and future outcomes will improve considerably

Our Strategic Priorities 2023 - 2026

Outcome 5: We will support the partnership with a focus on the appropriate application of the Pathways document across partner agencies to ensure the right service is provided with the right children at the right time

Across the next three years, this means:

- The Pathways Document will be consistently applied across the Partnership to ensure that children, young people and their families receive the right levels of support when needed
- Children, young people and their families will receive proportionate interventions

How will we do this?

We will:
