

Every Child a Talker (ECaT) Parent Session

ECaT in Southampton is a programme to support the development of communication and language skills from birth to five years of age.

There is increasing evidence of strong links between early communication skills and early literacy development, all of which parents are well placed to support their children with.

Jan Stevens, Early Language Consultant/Speech & Language Therapist is available to deliver the following **FREE Parent Workshop** at your setting

Language and Early Literacy Skills

Parents and Carers are invited to this 1 hour session where they will find out about the development of early language and literacy through everyday fun and interesting activities, helping them to encourage their children to become competent early readers and writers.

Please contact Sally (sally.griggs@southampton.gov.uk) to express your interest in booking Jan Stevens to deliver a Parent Workshop at your early years setting.
