

Last chance to apply for The Low Emission Taxi Incentive Scheme

We encourage any taxi or private hire drivers who are still considering taking up the scheme to act now as we only have a few applications remaining

Go to [Taxi Incentive Scheme \(southampton.gov.uk\)](https://southampton.gov.uk/taxi-incentive-scheme) and pay close attention to the key terms and conditions.

Please ensure you apply before you buy, so we can confirm that the vehicle is valid for the scheme.

The grant applications have helped support drivers shift towards low emission vehicles. Thanks to the involvement of the trade in this scheme as well as other measures the council has in place, over 50% of the city's taxi and private hire fleet are now hybrid or electric vehicles, one of the highest figures of any city in the country
