VEHICLE AGE CONDITIONS – COVID 19

Last week Southampton City Council made the decision to extend the ages of all vehicles that are due replacement at renewal for the rest of this year. This means that if a licensed vehicle is due replacement at its renewal, it will be issued another annual licence. This will not apply to new vehicles joining the fleet or temporary vehicles. Age conditions will resume in January 2021.

However, because of clean air provisions that have previously been agreed with DEFRA relating to emissions, there will be no scope to extend this past December 2020.
